Pre final product:

The form is set against a teal background. On the left, a grey silhouette of a person is shown. To its right, a list of fields is provided for user information. Further right, a vertical menu titled 'Culoare de fundal' (Background Color) offers six color options: teal, yellow, purple, blue, and grey. At the bottom center, a green button labeled 'Salvează' (Save) is present.

SEARCH USER

FILTER BY

username	coins	solved problems	is author	can add comments	banned	manage user
	Text					
andrei	3000	25	true	true	false	<div>Menu</div>

Canvas + palette design pattern is used. Administrator filters the users via search field or filter by component (the tools) and manage them via table (canvas).

One window drilldown is used. All information is shown in one page.

3. Problem solutions history page:

Final product:

When user tries to load an old solution, a modal is shown asking if he is sure about this decision.

Design decision: Modal panel, only 4 colors are used (green, blue, red, black) to avoid cognitive overloads.

Way finding design pattern is used: The buttons are obvious for their actions and they got clues of their actions.
